

## **Project Participants:**

Adam Salt

## **Title:**

Watchdog Orders

## **Executive Summary:**

A simple application that allows you to Create Watchdog solar mobile tower orders.

## **Initial Features:**

- Entities: Accessories, Customers, Order, OrderDetails, OrderDetailsPK, OrderRequest, Watchdog, WatchdogModel.
- A User can perform the following operations:
  - Browse all Watchdogs (GET on Watchdogs)
  - Create an order (POST in Orders)
  - Return Watchdog order (GET on Order)
  - Update an order (PUT on Order)
  - Delete an order (DELETE on Order)

## **Stretch Goals (to be completed if time allows, or after graduation):**

- After course completion, once transitioned to doing this full time at work I plan to expand on this to include being able to do full CRUD operations on customers, accessories, and watchdogs like with orders.
